**PACER RELEASE - NEW**

The United States Bankruptcy Court for the Western District of New York is pleased to announce a new release of the PACER software. Although this new release was developed with the goals of making it compatible with the Y2K millennium issues, numerous enhancements were also developed to modernize the software. The enhancements to the product include new options to the "Listing of New Cases." The reporting options now allow you to select to receive cases filed for any particular date or date range supplied. In addition, the report now allows you to select between two options for retrieval, "r" for the normal visual report, and the new "d" or dump option for uploading and saving into a locally developed database. (Note: This option is not a feature of PACER and the Court provides no support for this.) In addition, the debtor/joint debtor's address is now included in the report. Another major milestone is the availability of the complete case docket, not just the preceding 6 month's docket activity.

This new product will be enhanced in the future to allow case data to be retrieved via a traditional web browser interface. We are very excited to be able to bring this new technology to the world wide web community at large.
